Website Project Proposal: Sunrise Bakery

1. Organisation Overview

Sunrise Bakery is a fictional neighbourhood bakery with collection points in Rosebank and Sandton. It sells fresh bread, pastries, cupcakes, celebration cakes and coffee, while accepting custom-cake orders. Its mission is to make high-quality baked goods accessible to local customers; its vision is to become the area's welcoming everyday bakery. The target audience is local families, office workers, students and customers arranging birthdays or small events.

2. Website Goals and Objectives

The website will increase local visibility, show products and prices, generate custom-order leads and make collection information easy to find. Success will be measured through product-page visits, completed cake-enquiry forms, contact submissions, calls and location-direction clicks.

3. Current Website Analysis (if applicable)

As this is a fictional client, no current website exists. The proposed site will present consistent product, location and order information in one mobile-friendly place.

4. Proposed Website Features and Functionality

The required pages are Home, About Us, Products, Enquiry and Contact. Home will feature a welcome message, promotions and calls to action. About Us will present the bakery story and values. Products will organise breads, pastries, cakes and drinks, with allergen notes. Enquiry will collect custom-cake requirements and collection date. Contact will provide opening hours, a general-message form and maps for both collection points.

5. Design and User Experience

The brand will use cream, sunrise gold, warm orange and deep brown to suggest freshness and warmth. Sans-serif text, strong heading hierarchy, descriptive image alt text and high-contrast buttons will support readability. Simple navigation, clear calls to action and low-fidelity wireframes will prioritise quick ordering on phones and desktops.

6. Technical Requirements

Part 1 will use standards-compliant HTML; Part 2 will add external CSS and responsive layouts; Part 3 will add JavaScript, validation, product filtering, a gallery lightbox and SEO metadata. The planned domain is sunrisebakery.co.za, subject to availability. An accredited registrar will supply the .co.za domain and hosting (ZADNA 2026).

7. Timeline and Milestones

Week 1: approval, research and wireframes. Week 2: sitemap, content folders and HTML pages. Week 3: testing and Part 1 submission. CSS/responsive work follows in Part 2; interaction, SEO and deployment follow in Part 3.

8. Budget

Estimated first-year cost: R105 domain registration, R1,188 shared hosting ($R99 \times 12$), R2,500 content/image preparation and R1,500 maintenance contingency: R5,293. Figures are planning estimates based on published entry pricing and require confirmation before purchase (xneelo 2026).
